As of: Thursday, January 15, 2026

Standard Features

- The vehicle weighing kit is composed of the WWS weighing pads, a product patented by Dini Argeo. The loading surface is made of a special high-strength aluminum alloy, designed to be strong and light. The IP68 protection against water and dust guarantees a long life of the pads even in case of bad weather. Easy to move and position, thanks to the integrated wheels.
- The touch screen weight indicator simplifies the use of the scale and allows the entry of master data. With integrated printer or USB communication port for saving the weighs and transport case to protect the weight indicator even in the rain. 10h of autonomy, thanks to the rechargeable battery.

Weighs the entire vehicle and calculates the weight of the axles. Up to 16 WWS series portable platforms and touch screen weighing terminal with integrated printer. Wireless version.

The Portable Solution to Weighbridge

WWS is the most cost-effective solution patented by Dini Argeo for weighing a vehicle. Thanks to the low weight and ease of transport, in just a few minutes it is possible to create a weighing station for weighing vehicles up to 4 axles using AF08 software. Compared to a traditional weighbridge, it does not require masonry work that can permanently occupy part of the yard space and is easily transportable.

Great Versatility of Use

The vehicle weighing kit is ideal to:

- Weigh vehicles and trucks up to 4 axles.
- Check the weight of the material transported by the vehicle and carry out simple checks on incoming/outgoing goods.
- Weigh for limited periods of time (harvests, crops, etc.) without the need for excavations or masonry work.
- Check for any vehicle overloads, avoiding penalties.
- Check the correct balancing of the vehicle.
